The first book published by Crash Course Books, a new imprint of Penguin Young Readers that will be an extension of the popular Crash Course YouTube channel founded by Hank and John Green

Everything Is Tuberculosis, John Green's second foray into nonfiction following the publication of *The Anthropocene Reviewed* in 2021, traces the journey of a young tuberculosis patient in Sierra Leone woven together with the scientific and social histories of how this disease has shaped our world and how our choices will shape the future of tuberculosis. The book builds on John Green's nationally recognized advocacy for increased awareness of the healthcare inequities that allow this curable, treatable infectious disease to also be the deadliest.

"This book is the culmination of a long journey toward trying to understand how a disease that has been curable since the 1950s continues to kill over a million people every year. I'm thrilled to be publishing it as the first title from Crash Course Books, and so grateful to all the TB researchers and survivors whose generosity with me made it possible for me to tell this story."—John Green
