

Dr. Doodlebug,
I can't find my
way home!

AMAZING ants!

Did you know? Ants use chemicals called pheromones to find their way home. In the maze below, Antonio the Ant is lost. Can you help him find the right path?

Thank you,
Dr. Doodlebug!

LET'S
GET STINKY!

DOODLE a bug!

All bugs have a superpower — even Sammy the stink bug! If you designed a bug, what superpower would it have and how would that superpower help the environment? Write down your ideas below.

Get the BUZZ: In *On The Air With Dr. Doodlebug*, you learn many facts about bugs and insects. There are a lot of similarities between the two, but they are also not the same. One fact that Dr. Doodlebug doesn't cover is that an insect has three body parts and six legs.

Now, doodle what your bug will look like in the space provided to the left.

Write and illustrate your own Dr. Doodlebug comic in the panels below!
What is your bug or insect's question for Dr. Doodlebug? Remember,
a comic needs a beginning, a middle, and an end.
